3

This is what we want

4

What We Don't Want

5

The Offshore Inventory

- Type of boat
- Length of cruise
- Budget
- Storage

6

Main with at least 2 reefs

7

8

Roller Reefing and a Luff Flattening System

9

10

Extended Head and Tack Patches

11

12

13

14

Sail Repair and Maintenance Underway

15

Most common types of repairs

- **Corner webbings**
- **U.V. covers**
- **Sun damaged cloth**
- **Seams**
- **Leech tapes**
- **Tears at spreaders on genoas**
- **Luff slides**
- **Reefing intermediates**

16

What to have in your sail repair kit

- Store in a dry place
- Many items may need to be replaced periodically even if they are not used
- Consider your sail type and expected routes when building your kit

17

Venture Tape

18

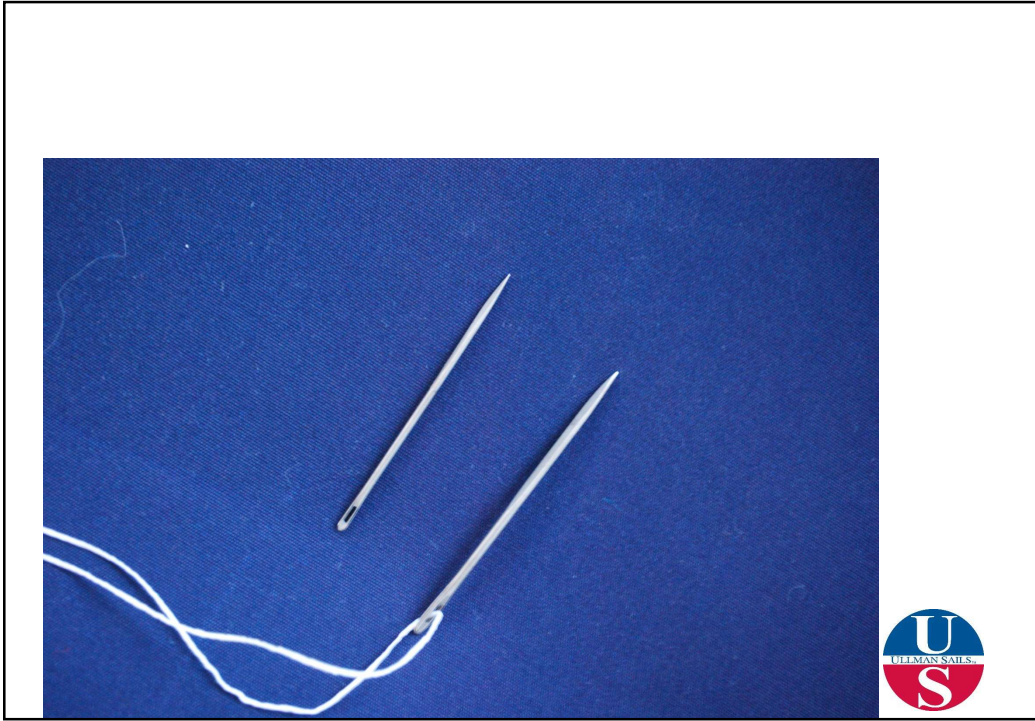

Stapler-the longer the better

19

21

22

23

24

25

26

27

28

29

30

Tubular Webbing

31

Several Seam Rippers

32

Butane Hot Knife and Spare Fule

33

Extra Cloth

34

35

Sewing Machines for Offshore

Sailrite Ultrafeed

\$800-\$900

Pfaff 130

\$450-\$550 with upgrading

36

How to Replace a Broken Luff Slide

37

38

39

40

41

42

Repairing Leech Tapes and Leech Tears

- Clean area with rubbing alcohol
- Remove all bad stitching or stitching next to tear.
- Line up tear as close to “original” as possible

43

44

22

45

46

47

48

Staple leech tape into place

49

50

Clew, Head, or Tack Webbing

Double Thread
Use Thick Needle
Punch Holes With Awl

51

52

26

How to repair a leech seam?

53

① Size the patch

② Cut and round

③ Do it twice

54

4 Fix mask tape

5 Grab DrSails®

6 ZZZ Apply

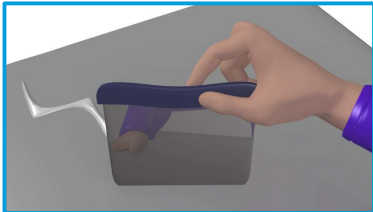

DR SAILS

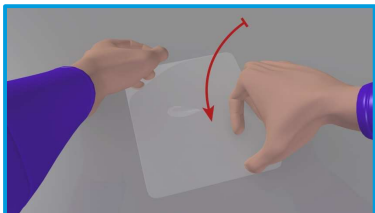

U S

55

7 Spread on patch

8 Place on site

9 Press all surface

DR SAILS

U S

56

10 Pull mask tape

11 Overlap the edge

12 Wait 20 min

57

Ussailing.org Safety Requirements

US Safety Equipment Requirements

Note: Organizing Authorities may want to consider adding items in beige tint based on the conditions of their specific races.

Effective Date: 1/1/2014

Section Name	#	Requirement	US Ocean	US Coastal	US Nearshore
Overall	1.1	The Minimum Equipment Requirements establish uniform minimum equipment and training standards for a variety of boats racing in differing conditions. These regulations do not replace, but rather supplement, the requirements of the US Coast Guard, the Racing Rules of Sailing (RRS), the rules of Class Associations and all applicable rating rules.	Long distance races, well offshore, where rescue may be delayed	Races not far removed from shorelines, where rescue is likely to be quickly available	Races during the day, close to shore, in relatively protected waters
Overall: Responsibility	1.2	The safety of a boat and her crew is the sole and inescapable responsibility of the "person in charge", as per RRS 46, who shall ensure that the boat is seaworthy and manned by an experienced crew with sufficient ability and experience to face bad weather. S/he shall be satisfied as to the soundness of hull, spars, rigging, sails and all gear. S/he shall ensure that all safety equipment is at all times properly maintained and safely stowed and that the crew knows where it is kept and how it is to be used.	x	x	x
Overall: Inspections	1.3	A boat may be inspected at any time by an inspector or measurer of the Organizing Authority. If she does not comply with these regulations her entry may be rejected, or will be liable to disqualification, or such other penalty as may be prescribed by the race protest committee.	x	x	x
		All equipment required shall function properly, be regularly checked, cleaned and			

58

29

Follow Up

- It is going to be more common to have light wind than heavy wind
- Always have a heavy wind plan. Sails, rigging, watch system
- Research weather yourself, don't just listen to others
- It is easier to have sails serviced before the trip than to find a place to fix them while cruising
- Have basic sail repair items on board

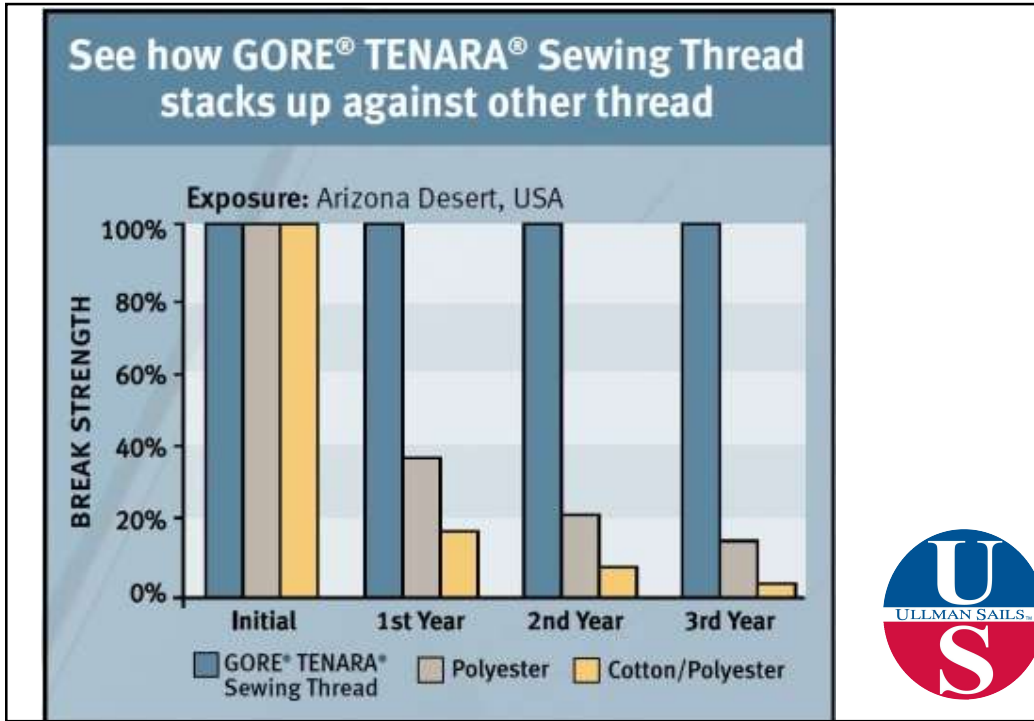

59

Follow Up (Continued)

- Rig reefs, preventers ahead of time
- Test storm sails out on a calm day, way before you need them
- Don't try to be on a schedule

60

61

What Ullman Sails Is Doing To Help You?

- Our Endurance and Voyager Series sails are sewn with 100% Gore Tenara Thread
- On Our Navigator Series we use it on the U.V. Cover
- Gore Tenara is not effected by U.V.
- Gore Tenara is stronger especially after the first year
- This allows you more trouble free sailing over a longer period of time

62
